

Leap Therapeutics Reports First Quarter 2022 Financial Results

May 13, 2022

CAMBRIDGE, Mass., May 13, 2022 /PRNewswire/ -- Leap Therapeutics, Inc. (Nasdaq:LPTX), a biotechnology company focused on developing targeted and immuno-oncology therapeutics, today reported financial results for the first quarter ended March 31, 2022.

Leap Highlights:

- Presented positive new data from the DisTinGuish Study of DKN-01 plus BeiGene's anti-PD-1 antibody tislelizumab and chemotherapy in gastroesophageal junction/gastric (GEJ/G) cancer patients at the 2022 American Society of Clinical Oncology (ASCO) Gastrointestinal (GI) Cancers Symposium
- Completed enrollment in Part B of the DisTinGuish Study evaluating DKN-01 plus tislelizumab in second-line GEJ/G cancer patients whose tumors express high levels of DKK1 (DKK1-high)
- Entered partnership on DKK1 companion diagnostic with Leica Biosystems
- Presenting initial data from the investigator-sponsored Phase 1b/2a clinical trial of DKN-01 in prostate cancer at the 2022 ASCO Annual Meeting

"We are making consistent progress in advancing DKN-01 across multiple tumor types and look forward to Dr. David Wise of New York University presenting initial prostate cancer data at the upcoming ASCO conference," said Douglas E. Onsi, President and Chief Executive Officer of Leap. "With compelling response and survival data for DKN-01 in combination with BeiGene's tislelizumab in gastric cancer patients presented in January, and the recent completion of enrollment in our second-line cohort, we are preparing for updated data readouts from our DisTinGuish study in the second half of the year. We are also looking forward to hosting an R&D Day in late June to outline the next phase in the clinical development strategy for DKN-01."

DKN-01 Development Update

DKN-01 is a humanized monoclonal antibody that binds to and blocks the activity of the DKK1 protein. DKK1 modulates the Wnt/Beta-catenin and PI3kinase/AKT signaling pathways, which play an important role in tumor cell signaling and in mediating an immuno-suppressive tumor microenvironment through enhancing the activity of myeloid-derived suppressor cells and downregulating NK cell ligands on tumor cells.

- **Positive New Data from the DisTinGuish Clinical Trial ([NCT04363801](#)) of DKN-01 Plus Tislelizumab and Chemotherapy Presented at the ASCO GI Cancer Symposium.** In January 2022, the Company presented positive new progression-free survival (PFS) and overall response data from Part A, the first-line cohort of the Phase 2a study in patients with gastroesophageal junction or gastric (GEJ/G) cancer, and initial findings from Part B of the clinical trial, studying DKN-01 and tislelizumab in second-line advanced GEJ/G cancer patients with high tumoral DKK1 expression.
 - **Part A First-Line Patients:** Of the 25 first-line patients who received a full cycle of DKN-01 therapy, overall response rate (ORR) was 68.2%, with 90% ORR in DKK1-high patients (9 partial responses (PR)) and 56% in DKK1-low patients (1 complete response, 4 PR). Among those patients with low PD-L1 expression ORR was 79% (with 100% ORR in DKK1-high patients and 57% ORR in DKK1-low patients), and in patients with higher PD-L1 expression ORR was 67% (with 75% ORR in DKK1-high patients and 50% in DKK1-low patients). The preliminary median PFS was 10.7 months in the overall first-line population, and median overall survival had not been reached. The Company expects to present updated survival data from the study in the second half of 2022.
 - **Part B Second-Line Patients:** Of the 30 second line DKK1-high GEJ/G cancer patients who received a full cycle of DKN-01 therapy and were response evaluable, ORR was 25%, with an additional patient who experienced an irPR by iRECIST criteria.
- **Completed Enrollment in the DisTinGuish Clinical Trial ([NCT04363801](#)) of DKN-01 Plus Tislelizumab in DKK1-high Second Line GEJ/G Cancer Patients.** In May 2022, the Company completed enrollment in Part B of the DisTinGuish clinical trial, studying DKN-01 and tislelizumab in second-line advanced GEJ/G cancer patients with high tumoral DKK1 expression.
- **Entered Partnership on Companion Diagnostic with Leica Biosystems to Advance Care for Cancer Patients.** In January 2022, Leap and Leica Biosystems, a cancer diagnostics company, entered into an agreement to develop a companion diagnostic to detect DKK1 in patient tumor biopsies. The assay developed by Leica will utilize RNAscope™ technology on the BOND-III Automated Staining System, which allows for detection of DKK1 with high sensitivity and

specificity to help identify patients for DKN-01 treatment.

- **Abstract Accepted for Poster Presentation at the Upcoming 2022 ASCO Annual Meeting Highlighting Initial Clinical Data from the Phase 1b/2a Clinical Trial (NCT03837353) of DKN-01 Plus Docetaxel in Prostate Cancer.** The Company will present initial clinical data from the investigator-sponsored Phase 1b/2a dose escalation and dose expansion study testing DKN-01 as monotherapy or in combination with docetaxel in metastatic castration-resistant prostate cancer at the upcoming 2022 ASCO Annual Meeting taking place in Chicago, IL on June 3-7. Dr. David Wise of NYU Langone Medical Center is the lead investigator on the study.

Selected First Quarter 2022 Financial Results

Net Loss was \$10.4 million for the first quarter 2022, compared to \$9.1 million for the same period in 2021. The increase was primarily due to an increase in clinical trial costs due to the timing of patient enrollment and the duration of patients on study in the DisTinGuish trial and an increase in the number of research and development employees to support the development of DKN-01.

License revenues were \$0.4 million for the first quarter 2021 and relate to the agreement with BeiGene for the development and commercialization of DKN-01 in Asia (excluding Japan), Australia, and New Zealand. There were no license revenues recognized in the first quarter 2022, as the upfront payment was fully recognized as of December 31, 2021.

Research and development expenses were \$7.8 million for the first quarter 2022, compared to \$6.8 million for the same period in 2021. The increase in research and development expenses was due to an increase of \$0.6 million in clinical trial costs due to timing of patient enrollment in the DisTinGuish study, an increase of \$0.6 million in payroll and other related expenses, and an increase of \$0.2 million in stock based compensation expense during the three months ended March 31, 2022. These increases were partially offset by a \$0.4 million decrease in manufacturing costs related to clinical trial material due to timing of manufacturing campaigns.

General and administrative expenses were \$2.8 million for the first quarter 2022, compared to \$2.7 million for the same period in 2021. The increase in general and administrative expenses was due an increase of a \$0.2 million in stock based compensation expense and an increase of \$0.1 million in payroll and other related expenses during the three months ended March 31, 2022. These increases were partially offset by a \$0.2 million decrease in professional fees.

Cash and cash equivalents totaled \$103.2 million at March 31, 2022. Research and development incentive receivables totaled \$1.3 million at March 31, 2022.

About Leap Therapeutics

Leap Therapeutics (Nasdaq: LPTX) is focused on developing targeted and immuno-oncology therapeutics. Leap's most advanced clinical candidate, DKN-01, is a humanized monoclonal antibody targeting the Dickkopf-1 (DKK1) protein. DKN-01 is in clinical trials in patients with esophagogastric, hepatobiliary, gynecologic, and prostate cancers. Leap has entered into a strategic collaboration with BeiGene, Ltd. for the rights to develop DKN-01 in Asia (excluding Japan), Australia, and New Zealand. For more information about Leap Therapeutics, visit <http://www.leaptx.com> or view our public filings with the SEC that are available via EDGAR at <http://www.sec.gov> or via <https://investors.leaptx.com/>.

FORWARD-LOOKING STATEMENTS

This press release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, Section 21E of the Securities Exchange Act of 1934, as amended, and the Private Securities Litigation Reform Act of 1995, which involve risks and uncertainties. These statements include Leap's expectations with respect to the development and advancement of DKN-01, including the initiation, timing and design of future studies, enrollment in clinical studies, potential for the receipt of future option exercise, milestone, or royalty payments from BeiGene, and other future expectations, plans and prospects. Although Leap believes that the expectations reflected in such forward-looking statements are reasonable as of the date made, forward-looking statements are subject to known and unknown risks, uncertainties and other factors that could cause actual results to differ materially from our expectations. Such risks and uncertainties include, but are not limited to: that the initiation, conduct, and completion of clinical trials, laboratory operations, manufacturing campaigns, and other studies may be delayed, adversely affected, or impacted by COVID-19 related issues; unstable global market and economic conditions; the accuracy of our estimates regarding expenses, future revenues, capital requirements and needs for financing; the outcome, cost, and timing of our product development activities and clinical trials; the uncertain clinical development process, including the risk that clinical trials may not have an effective design or generate positive results; our ability to obtain and maintain regulatory approval of our drug product candidates; the size and growth potential of the markets for our drug product candidates; our ability to continue obtaining and maintaining intellectual property protection for our drug product candidates; and other risks. Detailed information regarding factors that may cause actual results to differ materially is included in Leap Therapeutics' periodic filings with the SEC, including Leap's Annual Report on Form 10-K for the fiscal year ended December 31, 2021, as filed with the SEC on March 11, 2022 and as may be updated by Leap's Quarterly Reports on Form 10-Q and the other reports Leap files from time to time with the SEC. Any forward-looking statement contained in this release speaks only as of its date. Leap undertakes no obligation to update any forward-looking statement contained in this release to reflect events or circumstances occurring after its date or to reflect the occurrence of unanticipated events.
